

Objectives

By the end of this project you will have learned to:

1. Create a document with only general layout specifications.
2. Introduce a Pantone® spot color.
3. Use step and repeat for accurate layouts.
4. Lock objects in position.
5. Print color separations.

Given

Fonts: ITC New Baskerville

Document specifications, see next page

Required

Using the page layout program assigned by the instructor:

1. Create documents as outlined on the following spec sheets.
2. Print to any color printer with printer's marks on.
 - color composite
 - color separations

Terminology

Pantone®

spot color

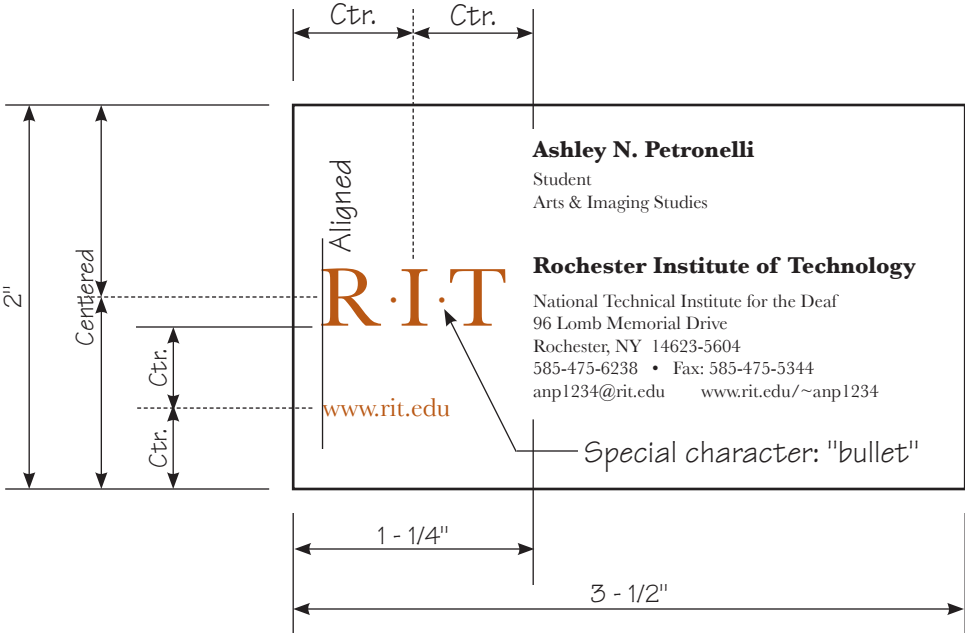

color separations

step and repeat

baseline shift

group and ungroup

DOCUMENT #1 LAYOUT
 the size of the card
 no margins

To make the bullet the correct size, change the font size. Then use "Baseline Shift" to raise it to the proper height.

SPOT COLOR:
 Pantone 1675
 Solid, Uncoated
 FONT: ITC New Baskerville
 Roman and Bold
 Spacing to match example

After completing the single card as shown above, "group" all the elements. Then create a second document as shown on the next page.
