

## Gradebook View Enhancements – 9/30/2014

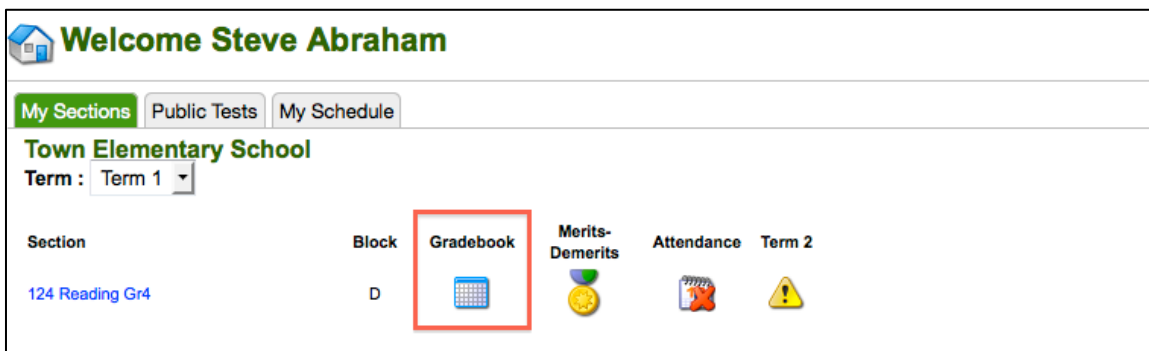

### Overview

Schoolbrains has added a third grading option to our Gradebook called Assignment Scope Grading. To enable this option we have made the following navigation improvements to our Gradebook. There have been no changes to the processing in the existing Scope Gradebook view or the Assignment Gradebook view.

Current users of the Assignment Gradebook, used most often in High Schools, will likely not be aware of this change. Current users of the Scope Gradebook, used most often in elementary and middle schools, will now have easier access to both Assignment and Scope Gradebook views within the Gradebook.

### Teacher Portal Gradebook access

Gradebook users no longer have two different links on the teacher default page. The Gradebook now detects the type of grading the section is configured for and chooses an initial default view when the Gradebook opens. Gradebook users can change this default view inside the Gradebook.

Term : Term 1

Section	Block	Gradebook	Merits-Demerits	Attendance	Term 2
124 Reading Gr4	D				

### Gradebook Tool Bar

We have improved the appearance of the toolbar and grouped tools within it to make navigation clearer and easier. In addition, we have added a Gradebook view selector. This selector allows Gradebook users who use multiple Gradebook views to easily switch between them. Gradebook users can choose their default view at any time by opening the Gradebook view they prefer and then pressing the green check icon. This sets the current Gradebook view for this section to be the default view.
