

Domain and Range

Date:

Standards

- F.IF.2 - Use function notation, evaluate functions for inputs and outputs in their domains,
- F.IF.5 - Relate the domain of a function to its graph and, where applicable, to the real life situation it describes.

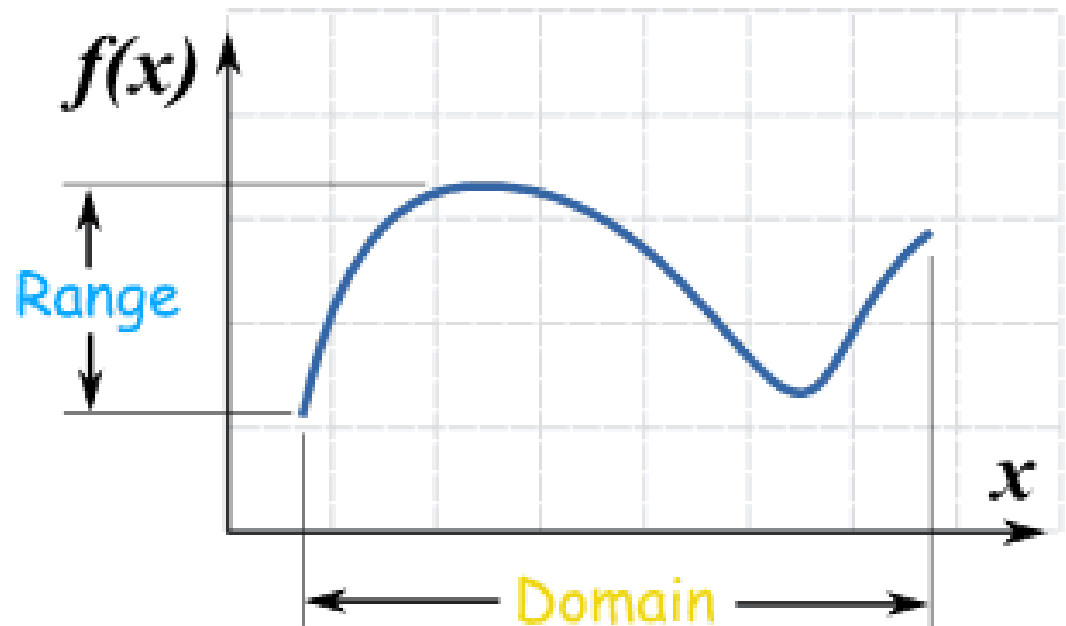

Essential Questions

- What is the Domain and Range of a function?
- How can I identify the domain/ range of a closed function?
- How can I identify the domain/range of a open function?
- How can I identify the domain/range of an infinite function?

What is the
Domain and
Range of a
function?

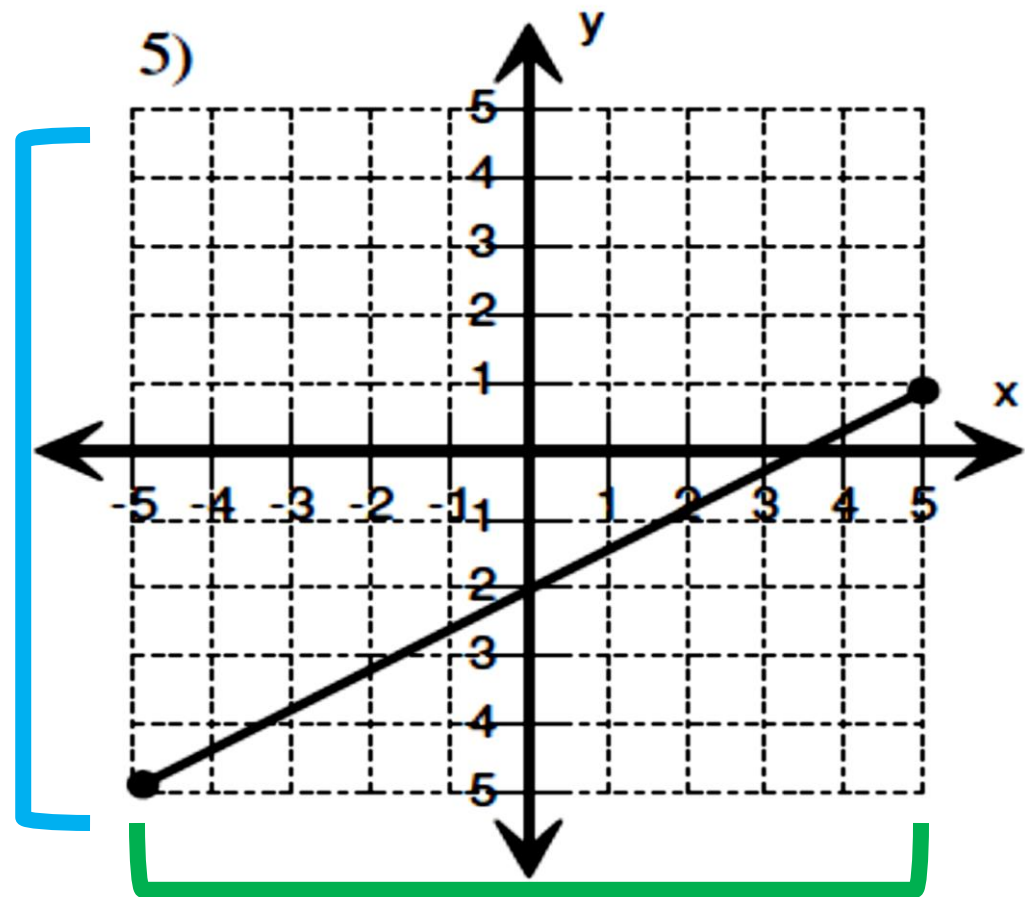

Domain: the set of all inputs or
 x – coordinates of a function

Range: the set of all outputs or
 y – coordinates of a function

How can I identify
the domain/
range of a closed
function?

Closed circles \rightarrow [

DOMAIN

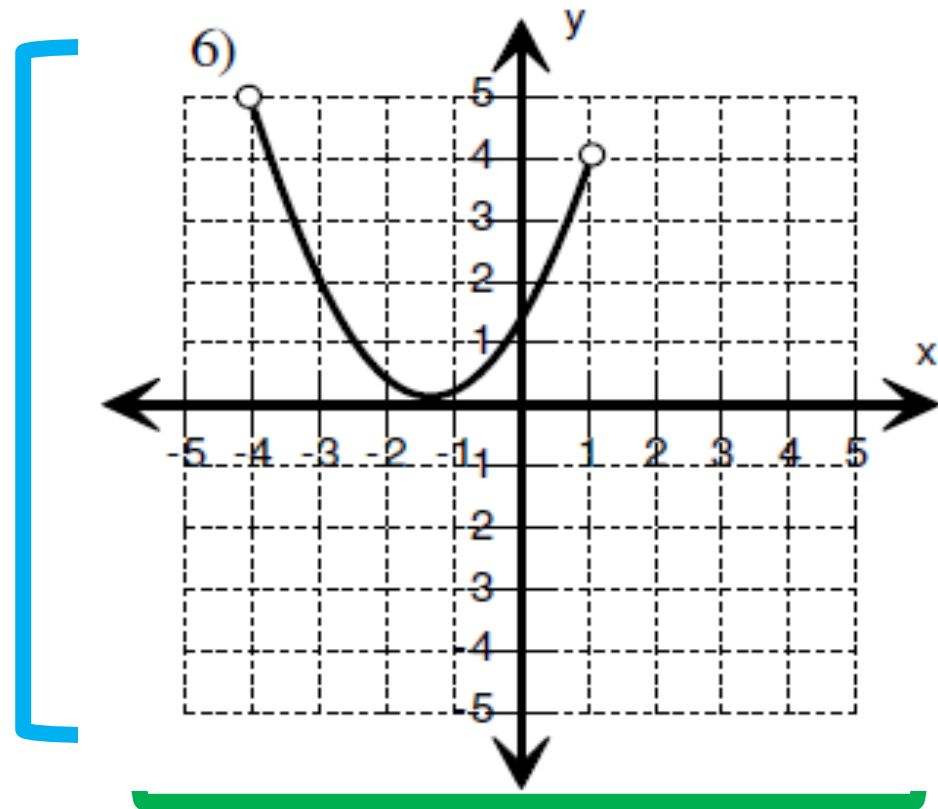

$[-5, 5]$

RANGE

$[-5, 1]$

How can I identify
the domain/
range of a open
function?

Open circles \rightarrow (

DOMAIN

$(-4, 1)$

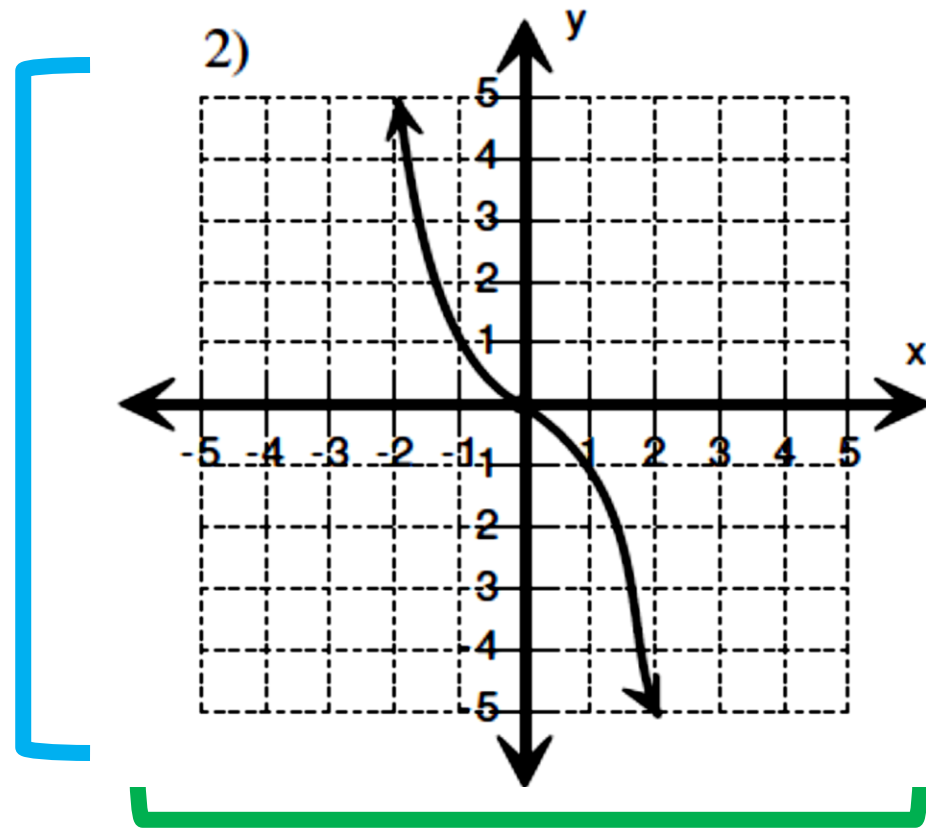

RANGE

$[0, 5)$

How can I identify
the domain/
range of an
Infinite function?

$-\infty$: decrease
without bound

∞ : increase
without bound

DOMAIN

$(-\infty, \infty)$

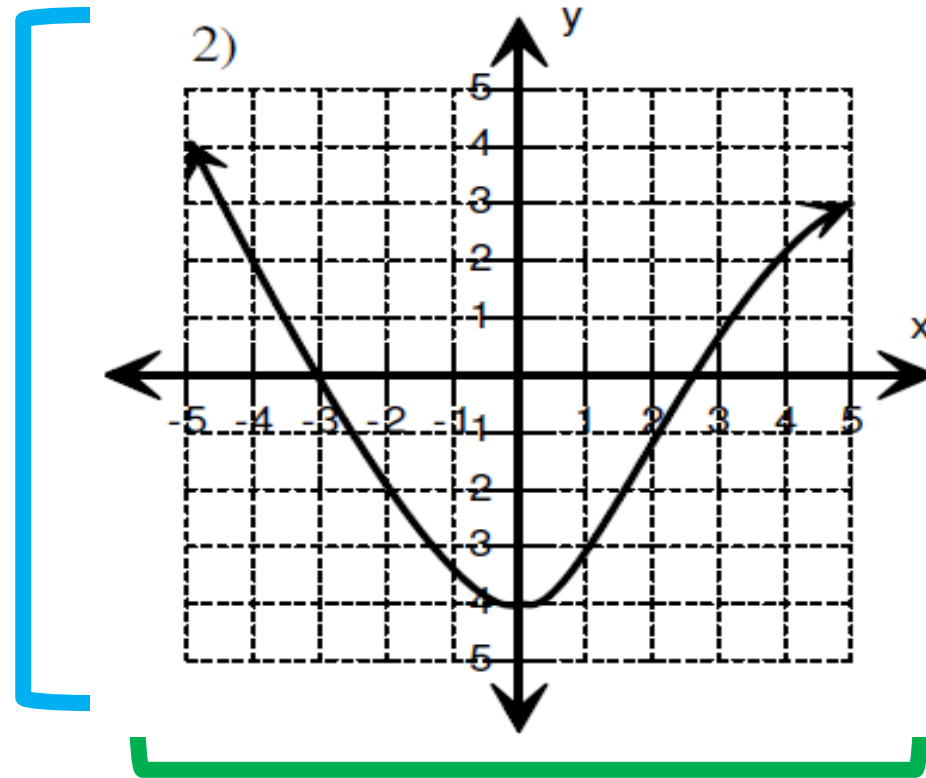

RANGE

$(-\infty, \infty)$

How can I identify
the domain/
range of an
Infinite function?

$-\infty$: decrease
without bound

∞ : increase
without bound

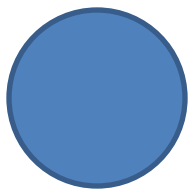

DOMAIN

$(-\infty, \infty)$

RANGE

$[-4, \infty)$

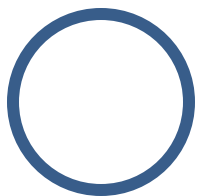

→ [

Increasing

∞

→ (

Decreasing

$-\infty$

→ [

REFLECTION:

- 1) Answer one essential question.
- 2) How have previous lessons helped or connect with this lesson?
- 3) What are you still confused on or what new info did you learn?
