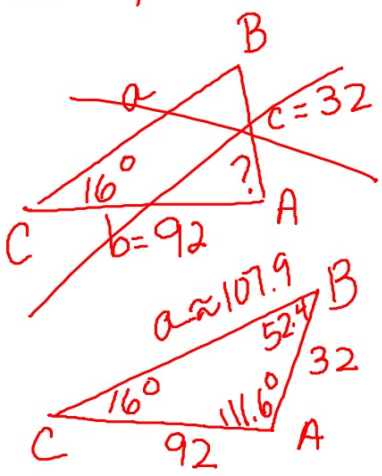
SSA triangles

$\angle C = 16^\circ, b = 92, c = 32$

Solve ΔABC.

ASS DonKey Δs



$\frac{\sin 16^\circ}{32} = \frac{\sin B}{92}$

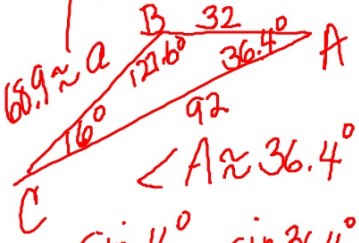
$\angle B \approx 52.4^\circ$

$\angle A \approx 111.6^\circ$

$\frac{\sin 16^\circ}{32} = \frac{\sin 111.6^\circ}{a}$

$a \approx 107.9^\circ$

OR $\angle B \approx 127.6^\circ$



$\angle A \approx 36.4^\circ$

$\frac{\sin 16^\circ}{32} = \frac{\sin 36.4^\circ}{a}$

$a \approx 68.9$
