

It is truly an honor to serve as the Principal of Orestimba High School, a comprehensive high school serving the communities of Newman and Crows Landing.

We have prepared this website and will continue to update it in the hope that it will become a valuable, centralized resource containing links to PowerSchool (our secure, online grade book system), to school information regarding policies, procedures and events for parents, students and members of the two communities that we serve.

The mission of Orestimba High School is to place a diploma in every hand and create the leaders of tomorrow by having a culture that maintains academic excellence, values diversity, promotes community and instills social responsibility. I am joined by our Assistant Principal, Ms. Teena Kotel, Learning Director Theresa Lerma-Wren, Learning Director Kelli Sharpe, and a committed staff of 35 teachers and a wide array of support staff in providing a “home away from home” for the students of this district. Orestimba High School is a safe, supportive learning environment where every student is prepared to achieve their future dreams, whether those dreams are college or workplace focused. Students and faculty are supported in a growing culture of academic excellence by cutting edge technology, preparing students for the unique challenges of their generation.

Orestimba offers a wide variety of curricular options to fit the needs of all learners, including AP classes, Honors classes, drama, music, ceramics, art, technology and agriculture classes. We also offer support classes for students that need extra support. Extra-curricular activities include a full schedule of sports activities and the many clubs available to students.

I encourage you to bring any of your questions and comments particularly regarding this website to the school, and we look forward to working with you and your family this year.
