

So in this post I will show you how to create a simple and minimalistic poster for the Daft Punk. We will use Illustrator and then Photoshop for some mockups.

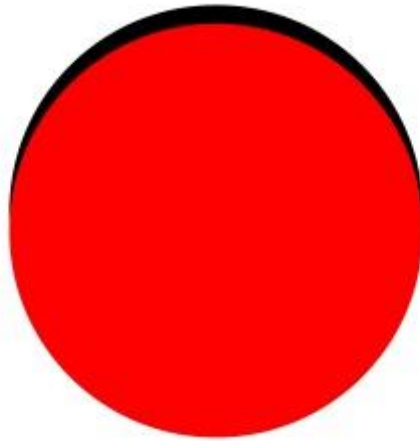

For this project, you will be “competing” with ALL other Graphic Arts, Technology and yes, even Yearbook classes. The competition will be voted on by a special select committee and the winners shall get...

REFERENCE

STEP 1

Open Illustrator and create a new document. I am using **A3** format. After that create **2 circles**. Overlap them like the image below.

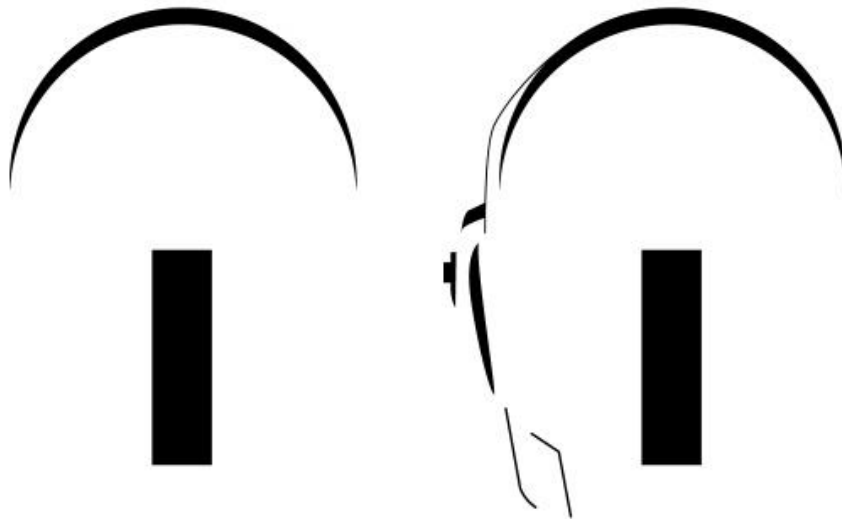

STEP 2

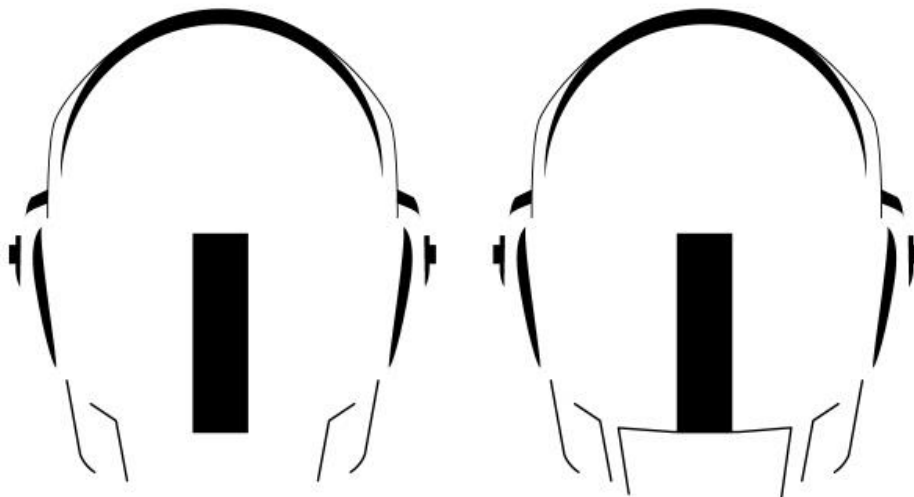

Go to **Window>Pathfinder**. Then click on the **Minus Front** to delete the red part and keep just the top. That will be the reflection of the helmet.

STEP 3

Now with the **Rectangle Tool** create a rectangle in the center, then with the **Pen Tool (p)** start creating the details on the side of the helmet.

**STEP 4**

Once you finish one side, just duplicate it and flip it horizontally to have the other part.

STEP 5

Create another rectangle based on the images we used for reference.

STEP 6

Apply a gradient to the biggest rectangle like the references used for the design.

STEP 7

Now just change the white to black for the colors and add a dark background.

FINAL RESULT

To finish the poster, let's add their logo and we're good. The design is pretty simple and minimalist, but it works really well. Now it's up to you to create your own.
