

Use Shortcut to find the quotient: Divide the numi's
Divide the deno's

$$1) \frac{\underline{5}}{12} \div \frac{\underline{1}}{6}$$

$$2) \frac{\underline{4}}{7} \div \frac{\underline{2}}{1}$$

$$3) \frac{\underline{17}}{150} \div \frac{\underline{1}}{3}$$

$$4) \frac{\underline{9}}{100} \div \frac{\underline{3}}{50}$$

$$5) \frac{\underline{6}}{121} \div \frac{\underline{3}}{11}$$

$$6) \frac{\underline{36}}{42} \div \frac{\underline{18}}{14}$$

Try these:

$$7) \frac{\underline{5}}{12} \div \frac{\underline{3}}{12}$$

$$8) \frac{\underline{13}}{121} \div \frac{\underline{14}}{121}$$

$$9) \frac{\underline{6}}{213} \div \frac{\underline{7}}{213}$$

$$10) \frac{\underline{10}}{517} \div \frac{\underline{11}}{517}$$

Use Shortcut to find the quotient: Divide the numi's
Divide the deno's

$$1) \frac{\underline{5}}{12} \div \frac{\underline{1}}{6}$$

$$2) \frac{\underline{4}}{7} \div \frac{\underline{2}}{1}$$

$$3) \frac{\underline{17}}{150} \div \frac{\underline{1}}{3}$$

$$4) \frac{\underline{9}}{100} \div \frac{\underline{3}}{50}$$

$$5) \frac{\underline{6}}{121} \div \frac{\underline{3}}{11}$$

$$6) \frac{\underline{36}}{42} \div \frac{\underline{18}}{14}$$

Try these:

$$7) \frac{\underline{5}}{12} \div \frac{\underline{3}}{12}$$

$$8) \frac{\underline{13}}{121} \div \frac{\underline{14}}{121}$$

$$9) \frac{\underline{6}}{213} \div \frac{\underline{7}}{213}$$

$$10) \frac{\underline{10}}{517} \div \frac{\underline{11}}{517}$$
