### **Staff Involvement in Decision Making**

The Board desires that employees be given opportunities to take part in determining decisions which affect their work in the schools.

Such decisions may relate to educational goals and objectives, students and the instructional program, technology, the purchase of goods and services, budget and facilities planning, as well as to personnel regulations, rules, and procedures.

The Superintendent, central office administrators, building administrators, support supervisors, and the GREA Executive Board will develop channels for the intercommunication of ideas among staff, administration, and the Board, and will inform the Board of staff opinion when presenting recommendations for Board action.

Administrators and support supervisors are encouraged to establish advisory groups at the building and support department level.
