

Funding Proposals and Applications

The Board declares its intention for the district to expand and improve its educational programs through various means, including projects for which funding from the federal government or private sources may be available.

The superintendent and his staff will carry out a search for supplemental funding and provide for the development of proposals.

The Board will take official action on all applications to be submitted and will officially accept the grants when received.

The Board names the superintendent as the school official who will file applications in behalf of the district and act as the Board's authorized agent in submitting reports and signing documents pertaining to special funding.
