

A6

Find the slope and y-intercept. Then use the slope and y-intercept to graph the line.

1. $y = 2x - 1$

2. $y = -3x + 7$

3. $y = \frac{-2}{3}x + 4$

4. $4x + 5y = 15$

5. $3x - 2y = 6$

6. $4x - y - 3 = 0$

Find the x - and y -intercepts. Then use the intercepts to graph the line.

7. $3x - 6y = 18$

8. $-2x + 5y = 10$

9. $-11x - 8y = 44$

10. $8x + 4y = 20$

11. Solve by substitution:

$$x + 2y = 1$$

$$5x + 3y = -23$$

12. Solve by linear combination:

$$4x + 7y = -9$$

$$3x - 3y = 18$$
