

Speech and Language Therapy

Speech and language development is important for learning and communicating with others. Early assessment and treatment of speech and language delays and disorders is essential for improving your child's development. The following abilities are assessed during a speech and language screening:

- ❖ Articulation and Phonology
- ❖ Expressive/Receptive Language
- ❖ Voice/Resonance
- ❖ Fluency (Stuttering)
- ❖ Pragmatic Language Skills/Social Skills

If you are interested in receiving a speech and language screening contact Renee Brodbeck, MS CCC-SLP to set up an appointment or print the authorization form attached and return it to your child's teacher.

Occupational Therapy

Occupational Therapy identifies and addresses concerns with fine motor skills and handwriting for all age levels. "Handwriting Without Tears" curriculum is implemented with an individualized therapy plan to address the following:

- ❖ Grasp patterns, Letter formation, Legibility, Size/Placement
- ❖ Underlying weakness, Sensory processing, Visual perception, Memory

If you are interested in receiving an occupational therapy screening contact Kirsten Perkins, OTR/L to set up an appointment or print the authorization form attached and return it to your child's teacher.
