Remaing Balance \$ 6.00

Determine how much you think your Holiday budget might be. (make up something reasonable if you don't have a budget)

Use an equation to subtract from your beginning

Use an equation for the ending balance.

Come up with a list of 10 people you could buy gifts for. (if you can't think of 10 people, think of me)

Use the Internet to find the goods you want to buy as well as their price.

Use the Internet to come up with either a web address for where you are buying the good or a street address.
