

Program Overview

The ERUSD, Early Learning Program has a lengthy, distinguished history of nurturing and educating El Rancho's youngest students. In this, our 37th year of service, we are looking forward to preparing over 400 preschool students for success in elementary school!

As a program, our goal is simple; each day we strive to provide your child with a world class preschool experience that will provide him or her the foundation to excel academically and become absolutely anything or anyone they desire. The results for children who attend our program are striking—students leave our classrooms knowing letter names and sounds, recognizing numbers, possessing early writing skills, and perhaps most importantly- thinking critically and creatively.

Art

Utilizing the Art in Action curriculum, preschool students study the lives and masterpieces of several great artists over the course of the school year. To promote oral language development and critical thinking, children participate in "art talks" with their teachers in which they discuss and analyze great works of art from such notable greats as Vincent Van Gogh, Pierre Auguste Renoir, and Wasily Kandinsky.

Eligibility Criteria

The El Rancho Unified School District provides State Preschool services to children who are 3 to 4 years of age (whose third or fourth birthday is on or before September 1st of the fiscal year) and whose families meet income eligibility requirements set forth by the California Department of Education. Please contact the Early Learning Program office to obtain details.

Family Eligibility Criteria: (1) Child Protective Services (2) Current Aid Recipient (3) Income Eligible (4) Homeless

Literacy

Teaching preschool children the alphabet is a huge component of getting them ready to succeed in kindergarten. In ERUSD preschool classrooms, children master the alphabet with the Alphafriends program-- a developmentally appropriate system for teaching letter names and their corresponding sounds.

Math

Aligned with the standards of the National Council for the Teachers of Mathematics, Numbers Plus provides students with key foundational math skills that they will need for success in elementary school and beyond. With Numbers Plus, teachers use fun, engaging materials to teach children lessons in five content areas: Number Sense and Operations; Geometry; Measurement; Algebra; and Data Analysis.

Enroll

Our Early Learning Program office staff will be happy to assist you with enrollment. As an initial step, parents will be asked to complete a "parent survey" that will help us collect important family information. Classes begin in August of each school year. However, we will enroll children year round as space permits. We look forward to hearing from you!
