

# People + Experiments you should be familiar with

Griffith

Hershey + Chase

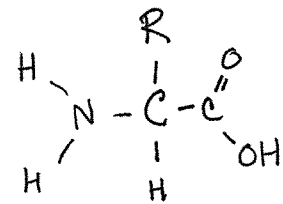

Watson + Crick + Wilkins + Franklin

Meselson + Stahl

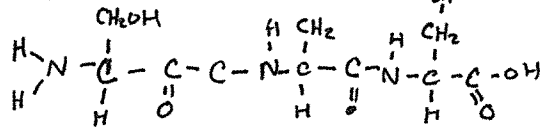

Avery, McCarty, MacLeod

## Basic Molecular Structures

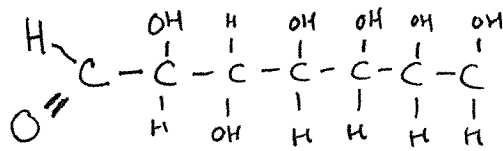

Proteins → subunit is amino acid

proteins are just collections of amino acids

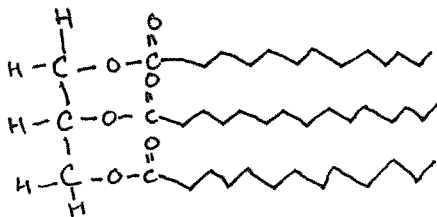

Carbohydrates →

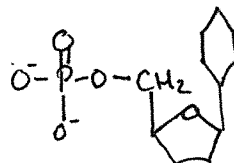

Chains of C, H, O only

lipids →

backbones including C, H, O  
with long CH tails

Nucleic acids → subunit is a nucleotide

chains look like
