

Homework Due Monday 8/25!

Using 10 different items in the fridge or pantry record the gram and ounce equivalents. Plot a graph of grams (on y-axis) vs ounces (on x-axis). Draw your best fit line and find the slope. Use your graphing guide to help.

Example:

Object	Ounce (oz)	Grams (g)
Mac and cheese	7.25	206
Snickers	2.07	58.7

Notice ounce and grams written on packages.
